

ASO OPERATIONS ANALYTICS HUB

Revenue, Labor & Market Resilience

ANALYTICS & INSIGHTS

The ASO Operations Analytics Hub is a production-ready, three-page Looker Studio dashboard that turns complex operational data into a clear executive narrative—revealing where revenue is gained, lost, and recoverable.

It begins by establishing a single source of truth for \$7.31M in April revenue, exposing a critical shift as 11.9% now flows through external payments post-regulation, then uncovers a hidden growth lever: peak hours (5–9 PM) deliver 35% higher productivity (\$387 vs. \$287 per FTE-hour), signaling a \$20–25M annual opportunity through smarter staffing.

Finally, it brings urgency into focus by quantifying a 40% traffic collapse from the April 26 algorithmic disruption while positioning AEO readiness at just 4/10—framing both the risk and the path to recovery.

With all 11 metrics audit-verified ($\pm 0.02\%$), the dashboard guides stakeholders through a cohesive data story that moves from clarity to opportunity to action—enabling confident decisions on monetization strategy, workforce optimization, and AI-driven market resilience.

Revenue & Monetization Intelligence

Hourly Revenue vs. Current Staffing (Flat Allocation Problem)

AI AGENT Traffic Volume (ANSWER ENGINE OPTIMIZATION TRACKING)

ALGORITHMIC IMPACT: 40% Traffic Decline (APRIL 26)

AEO Readiness score (current: 4/10)

AEO Readiness Score Components:

- 1. Answer Engine Optimization strategy (In Progress)
- 2. A2A/AP2 Protocol implementation (Planned)
- 3. Conversational commerce data structure (Planning)
- 4. Agent discovery optimization (Minimal)
- 5. Traffic recovery velocity (Early Stage)

* Current: 4/10 - Early implementation phase
